The torso of a white female was located by highway workers trimming trees in Wright City, Missouri at a westbound rest area off of I-70 just 50 miles from St. Louis, Missouri. She was found approximately 10' from the pavement, down a slight hill. It is estimated that the victim was murdered the day before she was found and then dumped at this site. Her head, arms, and legs had been removed but the victim did have a surgical scar from an appendectomy as well as a scar from a possible C Section. She had brown pubic hair and the only thing that she was wearing was a black Lei brand bra that was size 36B. The photo above is of a 12" Ginsu knife that was found in a sewer drain located in close proximity to the body. DNA is available.
